

MAKE YOUR OWN ROMAN DIORAMA DRAMA!

Follow the instructions to create your own Roman model town

MATERIALS

- Copies of this template printed or pasted onto A4 cardboard
- Scissors
- Sticky tape
- Glue
- Some wooden pop sticks
- A small shoe box

INSTRUCTIONS

Step 1

Prop up the shoebox so it stands up like a window frame.

Step 2

Carefully cut around the dashed lines on the template figures and backdrop.

Step 3

Sticky tape or glue the backdrop into the back of your shoebox first.

Step 4

Sticky tape cut-up wooden pop sticks to the back of figures to help them to stand up well.

Step 5

Add objects and figures into your diorama (model town) in the order that you want to see them. You can experiment with different layouts before you stick or glue them down. Think about what kind of story you want to tell.

When your diorama is finished you might like to add a layer of cellophane to the front to keep your diorama nice.
